Erica,

Thanks again for your comments, your and Sandra's edits really helped me with the NJ side of things. If you are still reviewing the supplemental then use the version I have attached to this email. It has incorporated changes suggested by Sandra, Mark, and John already.

With regards to the questions from the email,

Ex. 5 Deliberative Process (DP)

James,

My apologies again for the delay in getting you comments and suggested edits to the manuscript, see attached. Thank you again for all of this important work that has benefited NJ greatly. I would still like to review and comment on the supplemental information, I should have that to you early next week.

Ex. 5 Deliberative Process (DP)

RE: the Main Ditch. It really isn't a drainage ditch, it's a large tidal creek. It was probably constructed, but the name is a misnomer, it shouldn't really be compared to a ditch as one thinks of it.

Erica,

Thanks for laying it out. I'll need to make some edits to the text, and look forward to any additional comments you have.

Hi James,

Sorry for the delay, I will finish reviewing the draft and send you comments. I hope to have the comments to you by tomorrow.

Sorry this is so long, but I thought the full explanation might be beneficial. I first describe the private well selection process for the 2017 PFAS study followed by the 2019 POET study, and should answer both

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

I hope this helps, let me know if you need any additional information.

Erica,

Was wondering if you had any feedback on the manuscript draft that I sent out. I have already incorporated the revisions from Sandra and I had some remaining questions related to the POET systems that I thought you could answer for me.

Ex. 5 Deliberative Process (DP)

If you could let me know your feedback I will start trying to get the draft into advanced notification here at EPA and probably send it to Gloria Post for her review as well.

Subject: NJ Water Manuscript for Co-Author Review

Hello Everyone,

While Jon already did most of the heavy lifting regarding the soil work and source characterization for our friendly, neighborhood emerging contaminant I would be remiss to not also discuss the work we did with water. Since at least some of the water reports have gone back to NJDEP I figured it was time to reveal the scientific manuscript.

Find attached a short letters manuscript detailing the non-targeted analysis results from both the initial water sampling (which I somehow think we still haven't returned an official report on?) as well as the POET sampling follow-up.

If everyone could provide me with their feedback and other comments by the end of next week (May 15) I would be appreciative. I have started dealing with EPA internal review, but would like all the co-author comments before submitting a clean copy for advanced notification.

Thank you.
